- Full height system
- Over-door panels

Note: Any optional enhancements required are to be clarified at point of specification.

Very impressed with the cubicles that were delivered, very heavy duty and yet still look smart and functional. They were easy to install and went together quickly and strongly. Would recommend these cubicles to anyone wanting a robust and "classy" image to their washrooms. The level of service received both at sales and installer level was impressive and altogether made for a satisfactory transaction. Thanks for the experience.

Architectural Consultant

We at Parkinsons would have no issues in recommending Spectrum Cubicles for both the supply and installation of W C Cubicles and associated items as the service provided to ourselves was first class from the initial estimate to the delivery and installation on site which was carried out to the required delivery date, contract period and to a high standard of workmanship.

Construction Purchasing Manager

Spectrum Cubicles are exceptional in creative design. As a result we have had numerous compliments on the scheme which in quality and finish is superb.

The work on site was completed ahead of schedule due to good communications and a very clear understanding of the work processes involved. I would have no hesitation in recommending Spectrum to any buyer looking for a supplier who will take total ownership of the project and deliver a first class result.

Client

Just a few words about product delivered to us by yourselves. Discussions with yourselves & planning of the Wayz Centre W.C cubicle system - Excellent.

Cubicle System materials chosen - Very Good quality.

Delivery Date of materials - Spot on.

Overall dealings with your company - Excellent.

Would highly recommend your company.

Quantity Surveyor

Spectrum cubicles were specified at Pendleton College due to their reputation as being a tough and durable product and their previous successful use in heavy duty locations. The product allowed us to achieve the aesthetic requirements of the project whilst remaining within the anticipated budget. In addition to this, the system has performed well in the high-use environment of the college where such systems would typically withstand a high degree of impact and traffic each day.

Architect

I would just like to thank you for the service you provided whilst installing the toilet cubicles in our new offices in Mollington. The products you have provided are as promised of a high quality. We would also like to say thank you for a punctual, and honest service. We as a company would have no hesitation in recommending you to other companies.

Client

Very impressed with recent refurbishment of Club toilets using a unique cubicle system by Spectrum Cubicles. This product is a very strong design with a sleek, expensive looking finish. All dealings are with a friendly and extremely helpful team - we recommend Spectrum Cubicles to anyone looking to upgrade washroom facilities. Once again - Thanks to all!!
